rdst | 2026-05-05 09:00 UTC | LONG | first actionable origin

cnn: No actionable origin; no substitute example

Past images contain only signal-time inputs. Full 24h paths include post-stop context; later prices do not establish qualifying TP hits. Pink marks exported order ambiguity.
TP1/2/3 are MFE q .2/.5/.8: nominal 80/50/20 exceedance requires continuous calibrated targets; ties/zeros and execution invalidate a direct hit-probability interpretation.
